Her only sister, Mrs. Brockman, was buried within the last year, and her father, Mr. Oliver Corwin, about three years since. Her aged mother is still living, and was able, though eighty years of age, to attend the funeral and see her youngest child and last daughter laid away to rest.

Gump, the penitentiary guard, who felled with a club the convict O'Neil, who had killed guard Lantersbaugh in the penitentiary, is from Sidney. He attended the funeral of Lantersbaugh, at Mt. Vernon, and when it became known many people shook hands with him, and congratulated him for his courage, and he had an ovation. He advanced on O'Neil while the latter emptied two revolvers at him.

How True

At some time to every one the event comes. It may be by a sudden destructive blow, or a lingering illness, or it may be as a mere tap on the window pane summoning the spirit elsewhere, or as the gentle snipping of a thread. Often, so far as this world's affairs are concerned, death is the greatest calamity. To soften the force of the blow, or to diffuse and lighten the weight of the calamity, a life insurance policy is one of the best possible expedients, both for its holder and for those whom he leaves behind him. No wise man who realizes what lies before him, or has a heart for those whom he is to leave, can be willing to omit from his plans this provision for relief to himself and to his dear ones in the hour of distress.—Union Central Advocate.

GETTING OUT OF CUBA

Evacuation of the Island Will Be Completed Ten Days Ahead of Time.

GEN. BLANCO HAS RESIGNED

General Butler Says Military Rule of Cuba Will Be Necessary for Some Time.

Washington, Nov. 26.—General M. C. Butler, of South Carolina, a member of the Cuban Evacuation Commission, arrived here today from Havana, in response to a telegraphic summons from President McKinley, and this afternoon he had a two hours' consultation with the President at the White House. He made an extended report of the negotiations for the evacuation and of the terms upon which the Spaniards had agreed to complete the evacuation by January 1.

General Butler gave it as his opinion that all the Spanish troops will have departed ten days before the date fixed in the agreement. He says the Spaniards have met the American Commissioners with reasonable fairness, and that there has been little friction. Some of the claims they have made for compensation for Spanish property have been ridiculous, and they will, of course, be abandoned. General Butler denies all the reports of dissensions among the members of the American Commission.

In addition to his report upon the actual work of the joint commission, General Butler gave to the President much valuable information as to the general situation in Cuba, the ability of the Cubans for self-government, the military condition of Havana, and, generally, the results of his observation during his stay there.

Military Rule Necessary.

General Butler is of the opinion that the military government of the island must be continued for some time, but that it should only be as vigorous as may be necessary to preserve order. He thinks the Cubans are ambitious for self-government and anxious to avoid friction with the American authorities.

He thinks control in Havana, and in the order of the Italian Mafia, known as the Nangio, which was a source of terror to the inhabitants. One of the few commendable acts of Weyler was the deportation of about 15,000 members of this organization to the penal colony of Ceuta. But fears are expressed that these criminals may return or that the order may be revived by some of those who are not deported.

One of the features of the situation in which the authorities here are especially interested just now is the sanitary condition of Havana. The shipment of troops, which has already begun, and the existence of yellow fever in Havana all this year round makes it absolutely necessary that the city should be placed in thorough sanitary condition.

General Butler describes the city now as a pest hole, filled with unmanageable filth, equal and a situation. The Spanish authorities have, however, agreed to inaugurate the work of putting the city in sanitary condition with the aid of the American authorities, and work to this end is to begin at once.

The Dark Picture of Desolation. General Butler paints a dark picture of the desolation among the poorer classes, and says it will probably be necessary for the United States to furnish some aid to the starving wretches.

General Butler paid a high tribute to the discipline and uncomplaining suffering of the Spanish soldiers. They endured hardships, he says, which would have caused American soldiers to revolt.

As an illustration of the admirable discipline of the Spanish soldiers he said that at one time there were 43,000 Spanish soldiers in Havana; yet he never saw or heard of an act of violence, nor did he hear of one single Spanish soldier intoxicated.

The storm of Saturday night and Sunday, on the New England coast was the most terrible blizzard that ever visited that section. Vessel after vessel went down, a hundred lives were lost, and \$2,000,000 worth of property was destroyed.

Experience Proves It.

This is the season of the year when men who advertise get the cream of the holiday trade, and most of the skim milk besides.
